

CSC 102 Final

By: Endi Troqe, Nerishlyan Moreau, Harvey Boreau

Creativity

- Very elaborate creative process
- Used our creative process in order to change up the wire phase and the toggle phase in a way which would be both fun and challenging to play

Future Development Plans

- Change the timer function
- Change the keypad

Lessons Learned

- How to come together as a group in order to all achieve a common goal
- Learned how to use GitHub
- How to squash disagreements and come to a compromise
- Learned how to use the pi with classes and subclasses in order to make phases

Freedom to Redesign

- Change the light in order for it to flash a different color every three seconds
- Redesign the wires in order to make them bigger and more efficient to place
